# Query Optimization

## 8. Exercise, Winter 2007/2008

Due 2008-01-08

1. Show that the unranking function  $UnrankTree$  is bijective. (5)
2. Write a program that takes two arguments  $i$  and  $n$  and produces the  $i$ -th combination of  $n$  brackets. (5)
